- Sound RDBMS concepts and extensively worked with MySQL.
- Experience using persistence framework like Hibernate/JPA for mapping Java classes with database and using Hibernate Query Language (HQL).
- Experience in developing and deploying Maven applications in Tomcat webserver.
- Experience in using Git hub.
- Experience in Report Designing using Jasper-Report Designing tool
- Hands on experience in writing test scripts using Junit.
- Strong exposure to OOP concepts and Core Java.
- Experience in creating AWS EC2 instance and AWS RDS instances.
- Experience in deploying applications in AWS.
- Experience in creating wireframes using Balsamiq tool.
- Hands on experience in developing web application using Application express tool.
- Dedicated, resourceful and planning skills to deliver product on time.
- Quick learner and a team player looking for an opportunity for growth in a challenging environment.

### TECHNICAL SKILLS

Key skill : Java, Spring, Spring Boot, Microservices, Hibernate, Docker, Angular JS.  
Database : MySQL  
Tools : IntelliJ Idea, Eclipse, Oracle Apex, Spring tool suite.

## PROJECTS -#1

Project Name : SSP -Skidata Sales Platform  
Technology : Java, Spring Boot, Micro services, docker, Angular JS  
Database : PostgreSQL  
Duration : Jan 2017 – till date  
Role : Software Developer (Backend developer)

### Project Description:

Skidata Sales Platform is a single online platform for skidata.

Here customer can be B2B as well as B2C.

Customer can either register and reserve parking space for him or as an anonymous user he can do the reservation.

But for subscription of a product he must be the registered user in our system.

### Major modules

- ssp-tenant – Mainly responsible for the tenant and the organization unit details.
- ssp-Partner – Includes the customer and employee details of a tenant.
- ssp-pim – Product management
- SSP-Order – Responsible to record the order and subscription details of a customer.
- SSP-Payment – Responsible for recording the payment details and the payment methods of a customer. Right now we integrated with ingenico, payment express, wirecard.
- Ssp-invoice – Responsible for invoice generation.
- Ssp-report – Responsible for reporting.
- Ssp-auth – one of the major services. Which is responsible for authorization and authentication of the user. We are currently using OAuth2 which uses token based authentication.
- Ssp-notification – Responsible for sending email/SMS to a customer for each action done by the user. (Eg, Booking confirmation, User registration, Subscription and so on)

## PROJECTS -#2

Project Name : InspireNetz -Loyalty Management and customer engagement System.  
Technology : Java, Spring, Angular JS  
Database : MySql  
Duration : Feb 2016 – till date  
Role : Software Developer

### Project Description:

InspireNetz is a Loyalty management and customer engagement application. It provides a complete solution to customer engagement and Loyalty concerns. The product enables the merchant to set up

different types of loyalty programs with a high level of configurability. Customers will be earning points through the specified loyalty programs and can burn the points earned in provided catalogue items. Redemption (Burning of points) is a module which can be integrated with external third party merchants like Pizza hut and Krispy Kreme. Application is basically having 3 parts. API, integration layer and UI. Integration layer is placed or interacting with the external applications as a consumer or producer of Web services and API's.

#### **Major modules**

- .User Management
- .Points Earning
- .Redemption
- .Account Linking
- .Point Transfer
- .Charge Cards

#### **PROJECTS -#3**

Project Name	: DataXylo
Technology	: Java, Spring, Angular JS
Database	: MySQL
Duration	: Aug 2015 – Dec 2015
Role	: Software Developer

#### **Project Description:**

DataXylo is an agile, integrated predictive analytics platform on top of a rapidly deployed MDM (Customer- Master Data Management) with data discovery, unification, and cleansing capabilities, for business & technologist users.

The combined functionality enables business, marketers and technologist users, easily access to a central customer data platform across business silos and along with relevant Social graphics, Online Big Data & Third party information of the same customer, to fully understand, plan, and predict customers in a result oriented manner.

#### **PROJECTS - #4**

Project Name	: Online Customer Relationship management System.
Technology	: Oracle Apex
Database	: Oracle
Duration	: April 2015 – May- 2015
Role	: Software Developer

#### **Project Description:**

OCRMS (Online Customer Relationship management System.) is increasingly recognized as an effective operation management web application tool.

It helps in:

Fuel your database on periodic basis.

Maintain a real time calling report on daily basis

Get instant counts on companies, contacts based upon various selection criteria

Manage the enrichment, calling, lead generation status of all agents as individuals, project wise, etc.

#### **EDUCATIONAL QUALIFICATION**

- **B.E**(Electronics and Communication Engineering) from **Government Engineering College, Mandya, Karnataka**
